Device as a Service

A single, simplified service wrap, with end-to-end in-life management and reduced costs

O2 business

Organisations today need quick and easy access to the latest mobile tech ready to use, where and when they need it. Keeping teams productive and connected at all times.

We offer a broad range of devices and expert support with our fully managed service. Freeing up your IT team in setting up and managing devices, and reducing your capex spend with our flexible financing.

What is Device as a Service (DaaS)?

DaaS combines the costs of your devices and in-life services into a single, predictable monthly fee. This service wrap covers everything you need to configure, manage and deploy your devices, eliminating overheads.

O_2 Capital Residual Value

Our financing option will enable you to access newer tech for lower costs, helping your budget go further

Devices

We'll give you the latest tech to support your business and people to be productive

Enrolment and managed logistics

We configure, enrol and deploy devices at the start and we manage the repair and replace in-life service

Flexible financing with DaaS

With our as a service subscription model, the residual value of the devices you choose is set up-front and used to reduce the monthly payments over an agreed term. You'll save money upfront compared to paying with Capex, allowing your budget to go further and get managed logistics included.

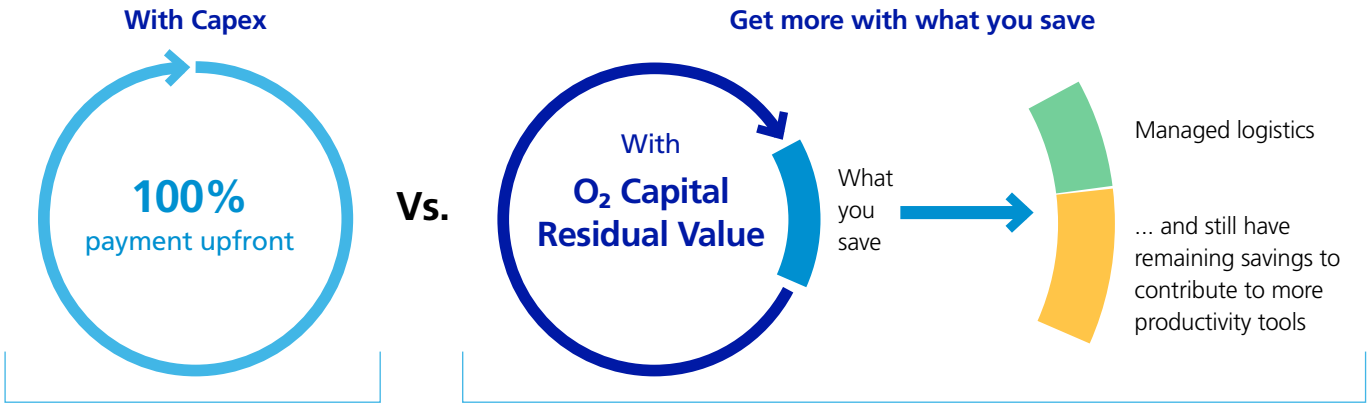

*Illustration represents a purchase of 1000 iPhone 15 devices over 24 months – based on pricing as of December 2023

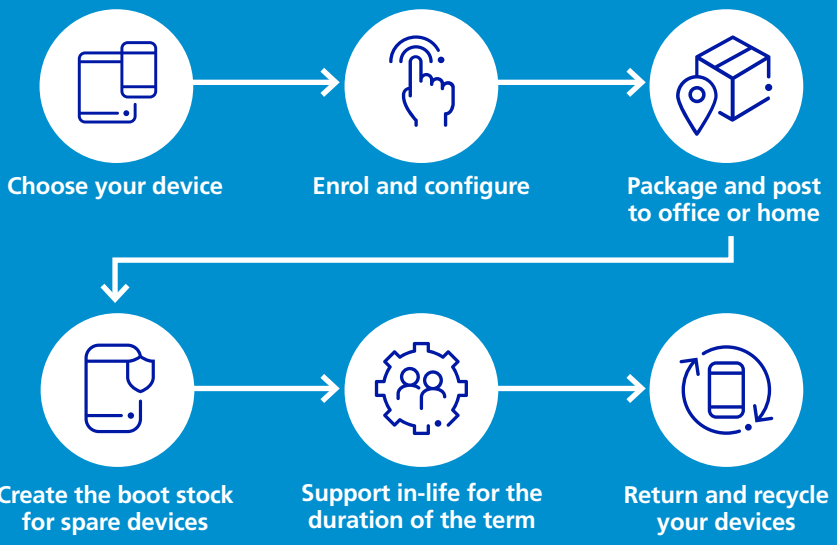
Enrolment and managed logistics

We streamline the device enrolment using your chosen device management solution (UEM). All devices are configured to your exact specification and delivered direct to the office or home. And our in-life management of your device estate includes next day replacements for broken, faulty or lost devices.

We'll also take care of your boot stock of devices for replacements, returns and repairs. And at the end of the term, you simply return the devices to be recycled or re-purposed.



How DaaS can help your business

Save money

- Save money compared to buying a new device up front
- Spread the costs into fixed monthly costs
- Savings can be used to drive efficiency with upgrades and contribution to wider mobile solutions

Effortless management

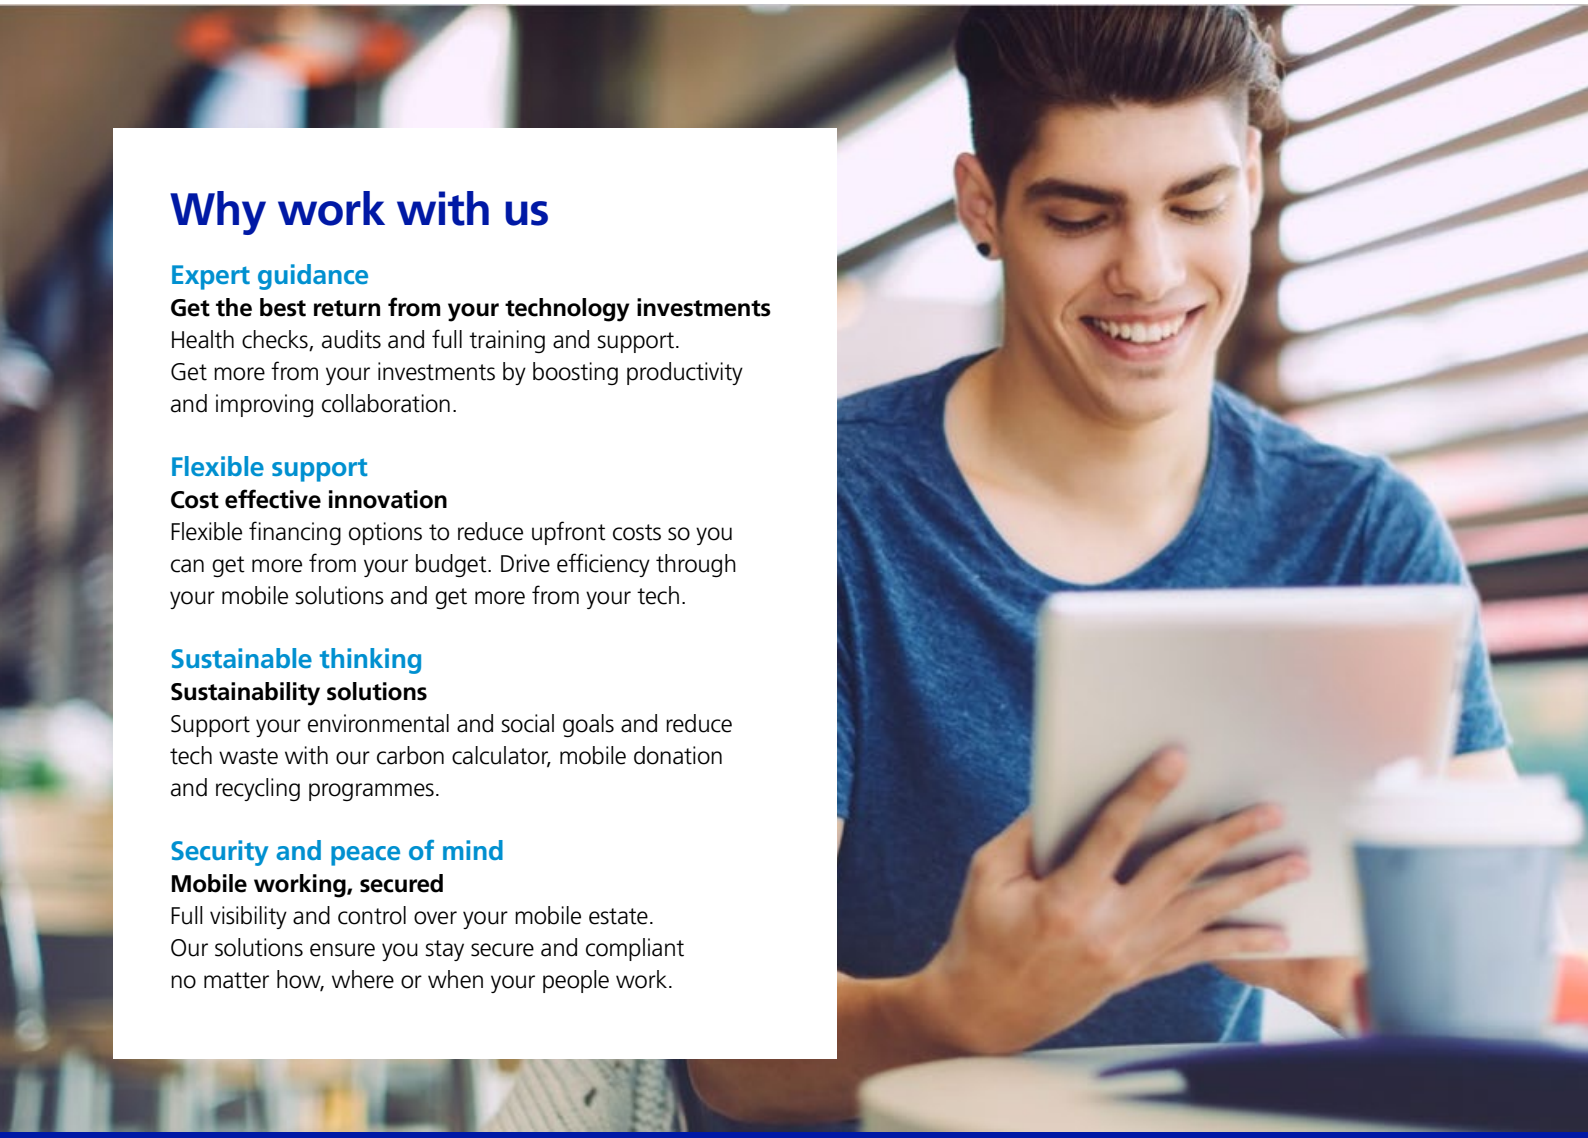
- Reduce dependency on internal IT support teams to set up and manage a multitude of devices
- Devices enrolled and configured out-of-the-box ready to use immediately and set up for business needs

Boost productivity

- Get the latest devices
- Fast next-working-day replacement for lost, stolen or broken devices
- Enrolled devices are compliant with business policies

Environmentally friendly

- Recycle and re-purpose devices at the end of your term
- Always be a part of a sustainable life cycle



Why work with us

Expert guidance

Get the best return from your technology investments
Health checks, audits and full training and support.
Get more from your investments by boosting productivity and improving collaboration.
