How to modernise digital working

A quick and easy guide for law firms

Digital agility is the new competitive edge

Client expectations are evolving fast. The law firms that modernise now will deliver faster, more transparent and more secure services. And stand out for it.

Here are five ways firms can use smart technology to boost client experience, productivity and compliance.

Virgin media O2 Business

1

Modernise case management and collaboration

Challenge: Legacy systems and manual workflows slow down cases and limit chargeable time.

Solution: Shift to secure, cloud-based collaboration that brings files, messages and updates together in one place.

We make it simple to modernise with cloud-first tools that connect case management, document sharing and compliant communications with minimal disruption.

2

Strengthen cyber resilience

Challenge: With hybrid working and rising cyber threats, client data has never been more exposed.

Solution: Protect every user, device and connection with end-to-end visibility and control.

Our enterprise-grade, government-trusted networks and mobile security solutions help firms meet Solicitors Regulation Authority (SRA) and General Data Protection Regulation (GDPR) standards while keeping sensitive data locked down.

3

Simplify compliance and governance

Challenge: Regulations keep evolving and firms must prove they're audit-ready and data-secure.

Solution: Choose secure-by-design platforms that make compliance part of everyday work.

We provide cloud collaboration with built-in audit trails, encryption and reporting to help you stay aligned with GDPR, client-specific standards and data rules

4

Enable seamless, flexible working

Challenge: Teams need to collaborate anywhere, anytime, without risking client confidentiality.

Solution: Empower people to work securely on the go, on any device.

From secure mobile solutions and eSIMs to managed connectivity, we can keep your firm connected without compromising your data, wherever your people work..

5

Build a future-ready, efficient practice

Challenge: Firms face pressure to innovate, attract top talent and boost margins.

Solution: Turn technology into a growth driver and talent magnet.

Our transformation workshops, ROI analysis and digital training can help your teams get the best from new tools, improving adoption, efficiency and confidence.
